Data Repository Work Flow

AWAITING

Section has not been started. Another section is probably .being worked on.

DONE

Section is completed. Peer review process will later on be performed.

DATA REVIEW

Data is being reviewed and arranged if needed.

STUCK

Some error has caused a major malfunction and fix is time consuming.

DEBUG

Defects are documented and corrected.

C

DESIGN

A design is being planned according to the data capabilities.

REVIEW

Implementation is reviewed and tested.

IMPLEMENTATION

Design is being implemented and coded. This is the longest part of the process.
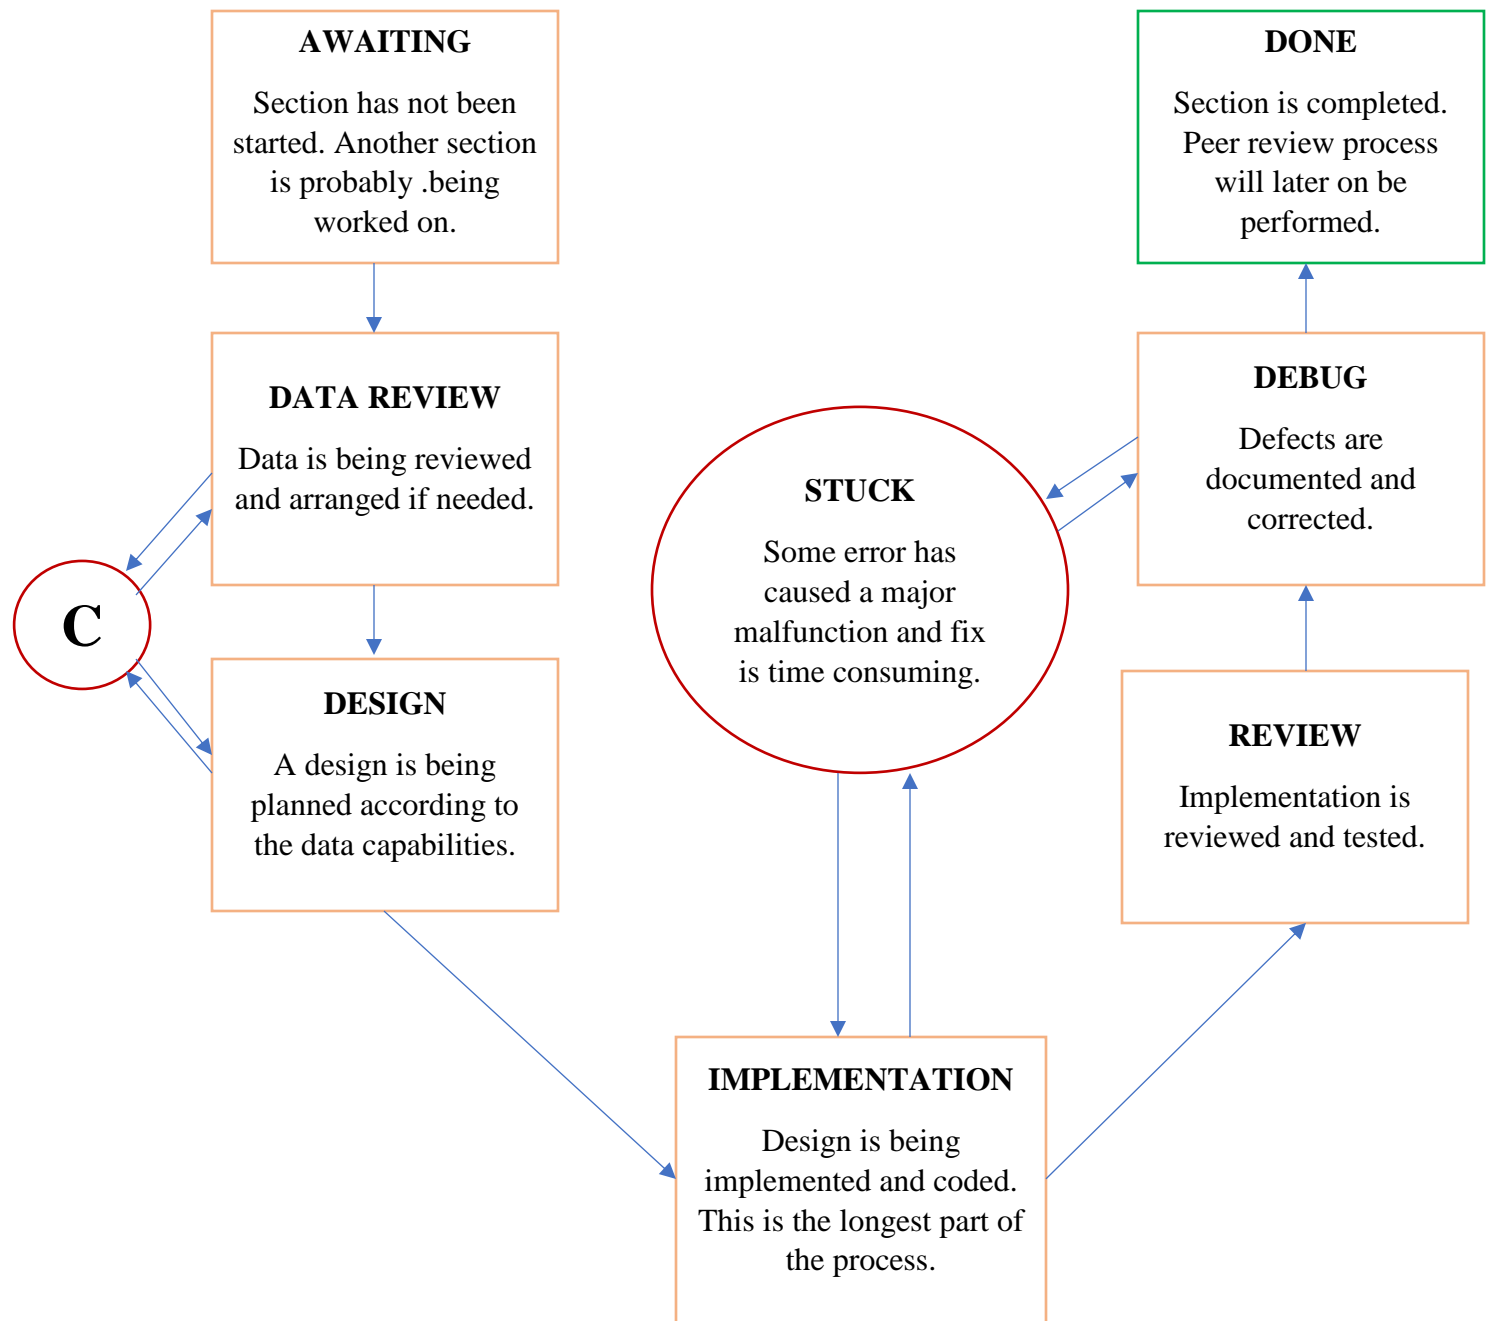

C section means clarification or further data processes are needed from Data Team.

Please note that defects might be detected, documented, and worked on during any section prior to the debug section, which will increase the lifetime of that section.
